INVITATION to the 5th ESPT Summer School

14. – 17. September 2020

The aim of the summer school is to give an overview about state-of-the-art.

Methodologies to develop stratified pharmacotherapies

The 2-half, 2-full day course consists of lectures by international renowned scientists and six parallel interactive workshops supervised by leading experts in the field. We expect participants from all disciplines being interested in translational research in pharmacogenomics from the research lab up to the clinic.

A social programme at the Baltic sea is included!

I am looking forward to welcome you in Kiel.
